---

Chris. Following your phone call regarding the above-referenced matter last week to my technical counterpart, Emilio Llamozas, I am writing to introduce myself and respond to your request for additional information relating to the July 27, 2011, crude oil spill. It is my understanding that Emilio already provided you with the National Response Center spill report for the July 27, 2011 spill (NRC Incident Report No. 984252). In addition, I have attached the North Dakota Oil Field Environmental Incident Summary relating to the spill. Emilio said you also inquired about the source of the valve-related question in the EPA's Information Request relating to the July 8, 2014, produced water spill. Question 6 was included in the Information Request based on the incident description in NRC Incident Report No. 1088376 citing the cause of the spill as damage to the pipeline's valve station. I understand that the NRC Incident Report already is in your possession. The EPA looks forward to receiving Crestwood Midstream Partners' response. Since Crestwood has retained legal counsel to respond to the EPA's Information Request, I would appreciate it if you would direct all future communications concerning this matter to me as the assigned EPA attorney. Per our records, Crestwood's response is due December 17, 2014. Thank you in advance for your cooperation,

**Amy Swanson** | Senior Attorney
